EVENT DETAILS

On 22 November 2024, the Department organized a one-day seminar on "Personality Development and Communication Skills." The seminar was held at Room No. 06 on the Ground Floor of the university, and it aimed to equip students with essential skills for both personal and professional growth.

The seminar was conducted by Dr. Ankur Shukla, the CEO of Exonbot Services Private Limited, an industry expert in the field of personality development and communication. Dr. Shukla has vast experience in guiding professionals and students to enhance their interpersonal skills, build self-confidence, and develop a strong professional presence.

The session was well attended by students from the Department of Computer Science and Applications, faculty members, and staff. Dr. Shukla began the seminar by emphasizing the importance of personality development in today's competitive world. He explained that personality development is not only about improving one's external appearance but also involves cultivating inner qualities like confidence, positive attitude, and emotional intelligence.

He also focused on the significance of effective communication, highlighting that communication skills are key to success in both academic and professional life. Dr. Shukla provided practical tips and techniques on improving communication, including body language, listening skills, verbal and non-verbal communication, and how to make a lasting impression in interviews and presentations.

Dr. Shukla engaged the audience with interactive activities and real-life examples, which made the session both informative and engaging. He conducted exercises to improve students' public speaking skills, taught techniques for better interpersonal communication, and provided valuable advice on how to network effectively in professional environments.

The students actively participated in the activities and took keen interest in the discussions, with many seeking personalized advice from Dr. Shukla on how to improve their personality and communication skills. The session was highly enriching, providing students with tools to enhance their self-confidence and professional demeanor.

In conclusion, the seminar was an excellent opportunity for students to learn important life skills that will help them not only in their academic journey but also in their future careers. The Department of Computer Science and Applications is committed to organizing such seminars and workshops that aim to provide holistic development for students, preparing them for challenges in the professional world.

The seminar concluded with a vote of thanks by the faculty, and Dr. Shukla's efforts in organizing and conducting the session were appreciated by all attendees.
